

American Roofing Products - Accessories

Our most common accessories are in stock; all others can be custom ordered - see your sales representative.

CondenStop® Condensation Control

Rolls of CondenStop® ready for application to panel

Condenstop® applied to R-Panel

CondenStop® CCM (Condensation Control Membrane) is an innovative product designed specifically to prevent problems caused by condensation in buildings and metal roof systems. CondenStop® CCM prevents dripping and keeps building contents and insulation dry.

CondenStop® CCM is the most secure and comfortable solution to deal with condensation in metal roofing. CondenStop® is applied directly to metal roofing panels by American Roofing Products - see your sales representative.
